

## Environmental Consultant

Salary: £24,000-£40,000

Location: Glasgow

We are looking for an enthusiastic Environmental Consultant, who shares our passion for the environment, to join our team. Training will be provided as an integral part of this job and tailored according to the applicant's previous experience. For us, positive attitude and potential are more important than experience.

MacArthur Green aims to only work with clients to [deliver a positive impact for our environment](#) and we need the right people in our team to achieve this. We are delivering a positive impact through our three core business objectives: (1) we help projects with important environmental benefits succeed; (2) we support ecological research projects important to sustainable development, and (3) we work hard to operate a carbon negative business.

In terms of what we do here at MacArthur Green, we specialise in ecology, ornithology, hydrology, and peat services, primarily focussing on supporting renewable energy, natural capital, and grid networks. We work for some of the most successful renewable developers operating in the UK, such as Vattenfall, ScottishPower Renewables, Scottish and Southern Energy Renewables, EDF, BayWa, and RES UK & Ireland, with projects onshore as well as offshore. We are also privileged to support statutory bodies such as The Crown Estate, the Scottish Government, NatureScot, Natural England and the UK Government.

If MacArthur Green sounds like somewhere you would enjoy working, read on!

### **Job Description**

The overall purpose of your role will be to collaborate with our team to successfully deliver projects that have important environmental benefits – such as renewables, natural capital, and grid projects. This will include:

- Project management and coordination and delivery of ecological, ornithological and natural capital projects.
- Client and stakeholder liaison.
- Preparing and supporting tender submissions.
- Managing the delivery of various types of environmental surveys.
- Environmental data entry and analysis.
- Preparation of various types of environmental report.

### **Essential Criteria**

- Qualified to MSc level in an appropriate environmental discipline (e.g. Sustainability, Environmental Science, Planning, Geography, Ecology, Zoology).

- A flexible and proactive approach to work.
- Experience of project management and managing a diverse workload.
- The ability to produce and review high quality reports.
- Strong IT skill including MS Word and Excel.
- A proactive can-do attitude.

Salary will be dependent on experience (salary band of £24,000 – £40,000). Other benefits include Bonus Scheme and Pension Scheme.

The role will be primarily based in our office in the west end of Glasgow, right on the banks of the River Kelvin. However, one good thing to come out of the pandemic is that it has shown us we can work as a team with everyone working remotely from home. We are happy to allow a flexible approach to working depending on individual needs. If your preference is to work from home (after a couple of weeks of induction training) we ask only that you pop into the office for bi-weekly visits to keep in touch in person with the team.

Submission is by CV and covering letter to: [recruitment@macarthurgreen.com](mailto:recruitment@macarthurgreen.com)

**NO RECRUITMENT CONSULTANTS PLEASE.**
